

2026 Southern Ontario Cybersecurity Report

Enterprise-Grade Security for SMBs | Trueline IT

Key Findings from 20 Southern Ontario Businesses (2026)

- 85% had zero encryption on sensitive files
- 92% had unpatched critical vulnerabilities
- 100% lacked formal disaster recovery plans
- 88% could not account for all deployed hardware
- Only 2 of 12 regulated businesses met PIPEDA standards

The Cost of Cybersecurity Gaps

One ransomware attack: \$50,000-\$200,000 CAD in recovery costs.

One undetected breach: Regulatory fines + reputation damage.

Trueline IT Cybersecurity Includes

- 24/7 threat detection and monitoring
- Encryption of sensitive files by default
- Automated security patch management
- PIPEDA compliance audits and documentation
- Incident response within 15 minutes
- Staff security training (included)

Pricing - CAD per user/month

Essentials: \$99 | Professional: \$149 | Complete: \$199
