

72% of assessed businesses underutilize Microsoft 365 security features.

— 2026 Trueline IT Assessment

M365 Security Layers

- 1. MFA
- 2. Data Loss Prevention
- 3. Advanced Threat Protection
- 4. Azure AD
- 5. Conditional Access
- 6. Encryption
- 7. Auditing
- 8. Compliance Manager
- 9. Insider Risk
- 10. eDiscovery

Common Gaps

- ✗ MFA Not Enforced
- ✗ DLP Disabled
- ✗ Weak Passwords
- ✗ No Auditing
- ✗ Misconfiguration
- ✗ No Training

10 Optimization Steps

- 1. Audit Current Setup
- 2. Enable MFA
- 3. Configure DLP
- 4. Set Retention
- 5. Enable Advanced Threat
- 6. Implement Sensitivity Labels
- 7. Configure Conditional Access
- 8. Enable Auditing
- 9. Train Users
- 10. Monitor Compliance

M365 Misconfiguration Risks

- Unauthorized data access
- Regulatory non-compliance
- Increased breach surface
- Lost compliance visibility

Optimize Your M365 Setup
